

AEMT UNIT EXAMS *(Pilot Version)*

May 2020

Fisdap AEMT Unit Exams are now available for pilot testing! Please help the Fisdap community by administering this pilot test to your students or fellow educators. This essential step of the process determines the validity of the questions and the future direction of each assessment. The following categories are available to pilot test individually.

Topic	# items	Cut Score %
Airway	84	71
Cardiology	86	70
EMS Operations	87	74
Medical Emergencies	87	68
Ob/Gyn	60	70
Pediatrics	85	71
Trauma	88	68

Each of the unit exams should be administered in a secure and proctored environment. In order to schedule an appropriate amount of time for each exam, please allow for 1 minute per question.

Any student with a Fisdap account can attempt the exams and Fisdap staff can generate a free pilot testing account for students who do not currently have an account. Student should have a piece of scratch paper and a pencil to write down issues or discuss concepts during their attempt and be sure to include the item ID number for reference.

For now, accessing the AEMT Unit Exams is different than other exams. They are secure and proctored assessments but they do NOT have to be scheduled inside of Fisdap.

Access the content:

1. Log into Fisdap
2. Go to [Fisdap Pilot Testing](#)¹
3. Select AEMT Unit Exams
4. Select Enrol Me
5. Select Category
6. Select Attempt quiz now
7. Enter password: AEMT2020

We eagerly await feedback and are excited to analyze the results! **At the end of the exam, please collect scratch papers to ensure exam security.** Any feedback can be submitted to cmorley@fisdap.net for details.
