

PARAMEDIC UNIT EXAMS *(Pilot Version)*

September 2020

Fisdap Paramedic Unit Exams (version B) are now available for pilot testing! Please help the Fisdap community by administering this pilot test to your students or fellow educators. This essential step of the process determines the validity of the questions and the future direction of each assessment. The following categories are available to pilot test individually.

Topic	# items	Cut Score %
Airway	85	74
Cardiology	65	72
EMS Operations	70	76
Medical Emergencies	68	72
Ob/Gyn & Pediatrics	65	73
Trauma	67	73

Each of the unit exams should be administered in a **secure** and **proctored** environment. In order to schedule an appropriate amount of time for each exam, please allow for 1 minute per question.

Any student with a Fisdap account can attempt the exams and Fisdap staff can generate a free pilot testing account for students who do not currently have an account. Student should have a piece of scratch paper and a pencil to write down issues or discuss concepts during their attempt and be sure to include the item ID number for reference.

For now, accessing the Paramedic Unit Exams is different than other exams. They are secure and proctored assessments but they do NOT have to be scheduled inside of Fisdap.

Access the content:

1. Log into Fisdap
2. Go to [Fisdap Pilot Testing](#)¹
3. Select Paramedic Unit Exams
4. Select Enrol Me
5. Select Category
6. Select Attempt quiz now
7. Enter password: PUE2020

We eagerly await feedback and are excited to analyze the results! **At the end of the exam, please collect scratch papers to ensure exam security.** Any feedback can be submitted to cmorley@fisdap.net for details.
