

Quick Reference Guide to SMC

2023

As of August 2021, CoAEMSP has put forth new guidelines for the **Student Minimum Competency (SMC) Recommendations** (effective January 1, 2023). To help meet these guidelines, Fisdap has implemented a new goal set template and report that provides the necessary data for **Student Minimum Competency (SMC) Recommendations** in the same format that CoAEMSP has requested. **Please note that the Student Minimum Competency (SMC) Recommendations Report is only available in Competency Tracker, NOT in Fisdap Skills Tracker.**

Once you are set up, creating the goal set and running the report should provide you with exactly what you need for your self-study. The following pages are the 5 **Student Minimum Competency** tables.
